PROFESSIONAL EXPERIENCE

Accenture | August 2022 – Present

Subject Matter Expert – Google Workspace Support | Dec 2024 – Present

- Directed advanced troubleshooting for complex chat and email tickets to support L1/L2 agents, accelerating issue resolution, consistently passing Total Resolution Time targets, and improving customer experience.
- Collaborated with Product Engineering on trend analysis and escalated critical bug tickets to accelerate resolution and enhance platform reliability.
- Engineered a comprehensive, AI-powered support web application utilizing the Gemini 2.5 API to automate email generation, integrating a dynamic knowledge base, interactive diagnostic decision trees, and multi-session compliance logging to significantly reduce ticket resolution times and standardize agent workflows.

Technical Support Representative L1 – Google Workspace Support | Jan 2024 – Dec 2024

- Resolved complex cloud service issues by translating technical concepts into clear, actionable resolution paths to improve customer satisfaction and to consistently hit quality performance metrics.
- Enforced strict adherence to protocols and standard operating procedures, minimizing miscommunication and compliance gaps.

Prompt Engineer | Mar 2023 – Jan 2024

- Accelerated Generative AI model performance by engineering and optimizing complex prompts utilizing Supervised Fine-Tuning (SFT) and Retrieval-Augmented Generation (RAG) architectures.
- Designed robust system-level instructions and dynamic conversational flows, facilitating highly accurate and context-aware AI chat interactions.
- Executed strict model evaluation techniques and negative constraints to enforce Responsible AI principles, successfully maintaining Helpful, Honest, and Harmless (HHH) outputs.

Data Engineer (Training & Certification) | Mid 2023 – Late 2023

- Credential: Databricks Certified Data Engineer Associate.
- Engineered scalable data pipelines for data extraction, transformation, and loading (ETL) using Databricks, Apache Spark, and Spark SQL.

- Designed hybrid data solutions integrating traditional data warehousing with Lakehouse architecture.

Full Stack Developer (Bootcamp & Upskilling) | Aug 2022 – Feb 2023

- Project BARS: Developed the "Billing Automated Requisition Service" and a secure internal portal utilizing React and Java Spring Boot.
- Engineered REST APIs to handle cross-platform data fetching and managed deployment pipelines via Jenkins and Tomcat.

TECHNICAL SKILLS

- **Google Workspace Administration:** Google Admin Console, Google Vault, ChromeOS, Chrome Browser, Device Management, Google Chat, Google Meet, Google Voice, GAM (Google Apps Manager), License Management, Organizational Units (OUs), Feature Governance, Google Drive Permissions, Service Enablement.
- **Incident & Change Management:** Platform-wide Configurations, Tenant/Group-based Controls, Data Recovery, Account Provisioning/Archival.
- **AI & LLM Engineering:** Prompt Engineering, Supervised Fine-Tuning (SFT), RAG Frameworks, Google Gemini API.
- **Data Engineering & Cloud:** Databricks, Apache Spark, ETL, SQL, Jenkins, Tomcat.
- **Programming Languages:** Python, SQL, JavaScript (React, Angular), Java (Spring Boot), PHP.

EDUCATION

Bulacan State University | Graduated 2022

BS in Information Technology (Web & Mobile App Development)

- Technical Focus: Java EE, SQL, PHP, React, and JavaScript.
